FREE GUIDE · DAY 3 OF 5

Build & host a website with Claude for free.

My exact prompt, plus how to put your site live on GitHub Pages, all from your phone. No coding, no laptop, ₹0.

@european.tamilan

KARTHIK · FINLAND · CAREER · AI

THE PROCESS

5 steps. ₹0. No laptop.

All you need is the Claude app and a free GitHub account (sign up at github.com).

1

Paste the prompt

Copy the prompt on the next 2 pages into Claude. Fill in the orange parts with your brand and products.

2

Check the preview

Claude builds the site and shows a live preview. Ask for changes in plain words.

3

Download index.html

Save the file Claude made to your phone's Files.

4

Upload to GitHub

Create a repo and upload the file. See page 5.

5

Turn on GitHub Pages

One setting, then your site is live with a link you can put in your bio.

COPY & PASTE · PART 1 OF 2

My exact prompt

Copy part 1 and part 2 together as one message. Fill in the orange parts.

COPY

```
Build me a complete, production-ready one-page DEMO
website for my digital products.
Deliver it as a single self-contained index.html file
(HTML + CSS + JS in one file, no build step, no
frameworks) so I can host it on GitHub Pages.

ABOUT ME
- Brand: [Your brand] (Instagram @yourhandle)
- I'm [name], I teach [your topic].

THIS IS A DEMO STORE
- Buy buttons look real, but when tapped show a small
animated popup: "🎉 Demo store — follow me for more!" with
a Follow button linking to my Instagram, and a close (×)
button.
- No payment links, no checkout, no forms that collect
data.
- Footer note: "Demo site built with Claude."

PRODUCTS (card: emoji, name, 1-line benefit, 3 bullets,
price, Buy button)
1. [Product 1 — benefit — price]
2. [Product 2 — benefit — price]
3. [Product 3 — benefit — price]
4. Complete Bundle — badge "Best value", highlighted —
[price]
Put all product data in one commented PRODUCTS array at
the top of the script.
```

COPY & PASTE · PART 2 OF 2

...continued

COPY

```
SECTIONS (in this order)
1. Sticky top bar: logo text, links "Shop" and "Instagram"
2. Hero: big headline, subheading, primary "Get the kits"
(scrolls to products), secondary "Watch on Instagram"
3. "How it works" — 3 steps
4. Products grid
5. "Who is this for"
6. Testimonials — 3 cards with placeholder text "[Your
real customer review here]" (do NOT invent fake reviews or
names)
7. FAQ accordion — 5 questions
8. Final CTA band + footer (Instagram link, email
placeholder, © year auto-updated, demo note)

DESIGN
- Mobile-first, flawless at 360px width
- Premium style: warm off-white bg (#FAF8F5), ink text
(#14141A), one accent (#FF6A3D), 20px rounded cards, soft
shadows, generous spacing
- Fonts: "Inter Tight" headings, "Inter" body (Google
Fonts)
- Fade/slide-in on scroll, button hover lift; respect
prefers-reduced-motion
- Min 48px tap targets; sticky "Get the Bundle" button on
mobile

QUALITY
- Semantic, accessible HTML; SEO + Open Graph tags; inline
SVG emoji favicon
- No external images; only relative links (works under
username.github.io/repo-name); no console errors

AFTER THE CODE, give me:
1. A live preview
2. Steps to host it on GitHub Pages from my phone
3. How to update the site later
4. How to add real payment links later
```

GO LIVE

Host it free on GitHub Pages

Do this in your phone's browser. If you can't see Settings, switch on "Desktop site" in the browser menu.

1

New repository

On github.com tap + → New repository. Name it short (e.g. shop), set it to Public, then Create.

2

Upload your file

Tap Add file → Upload files, pick index.html, then Commit changes.

3

Turn on Pages

Settings → Pages → Source: Deploy from a branch → Branch: main, folder / (root) → Save.

4

Open your link

Wait 1–2 minutes and refresh the Pages screen. Your site is at username.github.io/shop

5

Update anytime

Upload a new index.html (or edit it on GitHub) and commit. The site updates by itself.

PRO TIPS

Make it look like your brand

- Change the look in plain words: "make it dark mode", "use green as the accent", "make it look more premium".
- Use it for anything: a portfolio, a café menu, a freelance service, an event page. Just change the products and sections.
- Put the link in your Instagram bio so followers can see your products.
- Only add real reviews. Leave the placeholders until real customers send feedback.
- Ready to sell for real? Ask Claude: "replace the demo popup with my Razorpay / Stripe payment links".
